DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 14-19, filed 28 July 2008, with respect to the rejections under 35 U.S.C. § 103(a) have been fully considered and are persuasive. The rejections of the claims under 35 U.S.C. § 103(a) have been withdrawn. Applicant's present amendments to the claims have overcome the previously cited prior art references. Further, Examiner has not discovered any additional prior art which anticipates the presently amended claims and/or renders the presently amended claims obvious to one of ordinary skill in the art at the time of the invention.

Allowable Subject Matter

2. Claims 1, 4-7, 11-26, 29, 31-39, 42-46, 49-53, 57, 59 and 61-72 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 1 recites a system for printing multimedia data. The system includes an interface for receiving multimedia data from at least one of a plurality of different types of peripheral devices, and a multimedia processing system which generates printed and electronic representations of the multimedia data, which is common in the computing arts. The system also includes a formatting module which formats the printable representation. The formatting is performed according to a predefined format based on the specific type of peripheral device which provides the multimedia data, and is output either onto audio paper or video paper depending upon the type of multimedia data received. A first output device produces a printed output according to the formatting, and a second output device produces an electronic output. Formatting for video and/or audio paper based on the type of peripheral providing the multimedia data is advantageous since different types of peripheral devices provide different types of

Art Unit: 2625

multimedia data and a corresponding predefined printing format allows the printed representation to better represent the type of multimedia data received, as well as allowing for easier sorting based on a readily recognized format.

Examiner has not discovered in the prior art the particular combination of features recited in claim 1. Some relevant prior art includes Swaminathan (US-2002/0066782 A1) which teaches the use of multiple peripheral devices. However, Swaminathan does not teach the recited formatting for video and/or audio paper. Sugiyama (US-5,633,723) formats how the captured video is to be output on paper, but the formatting is performed with respect to user preference, and not with respect to the type of peripheral. Since Examiner has not found prior art which anticipated claim 1 and/or renders claim 1 obvious to one of ordinary skill in the art at the time of the invention, claim 1 is deemed allowable.

Claims 4-7, 11-26, 29, 31-34, 53, 59, 61-69, 71 and 72 each depend from claim 1, either directly or indirectly, and are therefore deemed allowable at least owing to their respective dependencies.

Claim 35 is a method for printing multimedia data. The method includes the formatting feature performed by the system of claim 1 and other features similar to those found in claim 1. Thus, claim 35 is deemed allowable for the reasons set forth for claim 1.

Claims 36-39, 42-46, 49-52 and 59 each depend from claim 35, either directly or indirectly, and are therefore deemed allowable at least owing to their respective dependencies.

Claim 70 is a system for printing multimedia data. The formatting module of the system formats with respect to video paper, but is not recited to format with respect to audio paper. However, this does not affect patentability since the system of claim 70 uses a predefined video paper format configured for a specific type of peripheral device providing the multimedia data. Thus, claim 70 is allowable for reasons similar to those set forth for claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
